Plot No 01, Block 128 B, New Creation Street, Off Remi Olowude Way, Lekki Phase I, Lagos.

Press Release: 15th June, 2009

SWAP Technologies Achieves NIS ISO 9001: 2001 certification from SON

SWAP Technologies & Telecomms Plc, a fully home grown Nigerian Telecoms infrastructure company kept its tryst with destiny by achieving the coveted NIS ISO 9001: 2001 certification from Standards Organization of Nigeria. This certification was achieved after years of preparation that involved setting up World class quality systems to achieve world class service delivery in the field of Telecoms infrastructure.

The certificate was recently awarded by the Director General of SON to Swap Technologies & Telecomms Plc.

The company had earlier obtained a licence from NCC for providing the **co-location services** throughout Nigeria. The licence allows the company to build cell sites all over Nigeria. The company is erecting telecom towers and building the entire passive infrastructure that will allow it to lease the sites to multiple tenants for co-locating their Base Transceiver Stations (BTS). SWAP will maintain these sites and will ensure 99.99% uptime and this is expected to be a runaway success as this will substantially reduce the Capital expenditure as well as the operating expenses of all the Operators. SWAP is currently working on construction of/ buying over nearly 120 BTS sites in Nigeria.

**SWAP's vision is to be among the Top 5 quoted conglomerates in Nigeria by 2011.
The company has operations in Nigeria, Ghana and Ivory Coast.**

SWAP Tech. & Telecomms is a Public Liability company and has about 570 happy investors who recently received handsome dividend of 15 Kobo per share for the financial year 2008.

The company is headed by Mr. Tunde Titilayo, a first generation banker-turned- entrepreneur who has successfully managed the transition of the company from an airtime selling company to a major infrastructure provider in the field of telecoms within a span of just 5 years.
